

FEATURES:

- Can be easily mounted to any CS or SC product for easier installation
- Can be used as a stand-alone relay
- Convenient Relay Status LED
- Can be factory assembled with any CS or SC product
- Push-rivets supplied for fast and reliable field assembly
- SPDT Form C relay contacts
- Environmentally-friendly cadmium-free contacts
- Ideal for switching contactors, solenoids and motors
- Small compact size

The Command Relay is designed to provide line voltage switching as either a standalone unit or in combination with a Greystone current switch or sensor. Use a signal from a switch or sensor to signal the BAS to output 12 or 24 Vac/dc to activate the relay, or use a current switch to activate the relay directly.
