### TYPICAL INSTALLATION:

**For complete installation and wiring details, please refer to the product installation instructions.**

**For best results, thermal conductive compound should be applied to pipe prior to mounting the probe.**

The TE200ES series can be mounted directly to various sizes of pipes and secured using the 10" S/S pipe clamp.

If necessary, remove a section of insulation from the pipe. The 10" S/S pipe clamp is a "Quick Release" type and can be separated by moving the tightening screw so that it is perpendicular to the clamp and sliding the clamp apart. Position the aluminum plate on the pipe so it makes the best contact, wrap the clamp around the pipe and re-assemble and tighten. Any excess clamp may be cut off.

Wiring connections are made inside the enclosure using a 2 or 3 wire pigtail. On the Round (E) enclosure a terminal strip is provided.
